

ASCI GitHub Rules

- The team leader has to create a repository with their “project name” and add other members to the same repository by inviting them on GitHub as shown.
- Repository must be public.
- The team leader have to add a markdown(.md) file on the ASCI 2021 repository the link of which is <https://github.com/SWITCH-CLUB/ASCI-2021>

Name of the file should be in the format < **team name.md** > inside the DOMAIN SPECIFIC folder.

- In the above mentioned file the team leader is responsible to write about their project. We have added a **template.md** file which you can copy and make one for yourself. Rename it to < team name.md >
- If you had followed whatever is shown in the session today. You are good to go.
- You can ask your doubts in the ASCI whatsapp group.
